Abstract: The study was delimited to 20 no of players who have played both the Indian super league and the I league for this purpose the investigator with the help of experts has prepared the questionnaire compromising of various statements was developed. There were two questionnaire developed for the separate two leagues the Indian super league consisting of 12 questions and for the I league 12 questions. The questions were based on independent variables i.e. coaches , foreign players, training programs, playing environment, financial benefit, national team, relationship with team mates and overall experience. Direction was given to fill up the questionnaire and respondents were assured that the information’s supplied by them would be kept strictly confidential and would be utilized for the research purpose only. The information’s obtained through the administrative of the questionnaire on the subject were compiled and analyzed by using percentage method to find out the results. Further the results have been exhibited through bar graph.

The purpose of the study was to determine the effects of both leagues on the development of Indian football. It hypothesized that there might be significant difference in both the leagues which effect the development of Indian football.

Keywords: Indian super league, I league, Indian football

Introduction

Football is most important sport and most famous sport in the world. football association around the world have their national leagues in their respective country governed by the world governing body of football that is FIFA. The national league contribute to football development of the nation through popularizing it in different ways. It gives creates playing opportunity to the local players and same payers from different region come to play in the league which promotes the football. The main purpose of the leagues is too promote the overall football environment. While there is only official league in the respective country which is the tradition in most of European and football playing nation India has observe ring a trend which has two leagues. I league is the main official league of India as per AIFF.

The introduction of the new league that is the I league has raised comparisons between the two leagues, while there are many assumptions the researcher is only focused on the effect it might have on the development Indian football.

Methodology

In this chapter detailed information about the selection of subject, selection variables, administration of questionnaire, collection of data and the appropriate statistical technique that will be used to complete the information taken in the case of study have been discussed.

Analysis of data:

The data was collected and data pertaining to each of the selected variables were examined in order to determine the results of the study. The data was analyzed with the help of percentage method. After analyzing the data the findings pertaining to different questions have been presented. The table representation in the form of bar graph has been presented.

This table shows the difference between the I league and the Indian super league

<table>
<thead>
<tr>
<th>GROUPS</th>
<th>MEAN</th>
<th>S/D</th>
<th>df</th>
<th>T TEST</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISL</td>
<td>41.7</td>
<td>5.487785</td>
<td>19</td>
<td>0.841358</td>
</tr>
<tr>
<td>I league</td>
<td>41.35</td>
<td>5.2141</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Level of significance = 0.05

For testing the difference of reaction time between the two leagues i.e. the Indian super league and the I league, the level of significance was set at 0.05 level of confidence.
CONCLUSION:

On the basis of the analysis all the data collected and during the student the following conclusion are drawn:

1. There was no significant difference between the means of Indian super league and the I league.
2. Both the leagues contribute equally to national level development of football.
3. Players prefer to play in both the leagues.
4. Environment in both leagues good for development of the player.
